

Linablue® G1-S ACI-0201

For Cosmetics industry

DESCRIPTION

LINABLUE® G1-S is a natural phycocyanin derived from spirulina, a microscopic algae with high levels of proteins, vitamins, minerals and antioxidants, often called "the king of superfoods."

LINABLUE® G1-S is an active ingredient that can be incorporated into various products such as serums, face masks, skin care, and make-up at a recommended dosage of 0.1 to 1.0%

LINABLUE® G1-S functions as an active ingredient and is not permitted for the purpose of coloration, UV protection and/or preservation in cosmetic products marketed in the United States, the European Union and/or other regions or countries whose regulations mirror those of the European Union.
